OPTIMIZED ELEVATION

FT² VS. FT³

One of Rosefellow's key advantages lies in designing properties with higher ceilings, allowing tenants to efficiently stack goods and make the most of their vertical space. This elevation effectively increases storage capacity per square foot, giving tenants the benefit of expanded operational flexibility without requiring a larger footprint. By maximizing usable space, Rosefellow helps its partners optimize costs and boost productivity, ultimately enhancing the overall value of each project.

ENERGY EFFICIENCY

This property exemplifies Rosefellow's commitment to carbon-zero construction, harnessing advanced materials, intelligent design, and renewable energy sources to drastically reduce emissions. Occupants not only enjoy significantly lower energy costs—thanks to high-efficiency insulation, lighting, and HVAC systems—but they also minimize their overall environmental impact by cutting resource consumption and greenhouse gas output.

Rosefellow offers these sustainable, forward-thinking spaces at competitive market net rents, ensuring that tenants can embrace cutting-edge design and environmental responsibility without compromising their budget.
